PRINTER RESOLVE

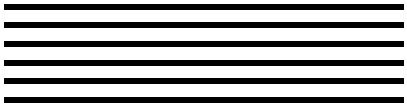
Print and copy comparison sheet

Print one copy on plain paper. Use Fit for A4 or US Letter. Mark the top edge and keep its orientation the same for the flatbed and feeder copies.

1 Compare the same marks across the page

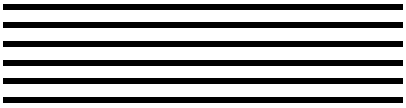
LEFT

Aa 28 / Mm 64



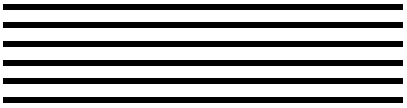
CENTRE

Aa 28 / Mm 64



RIGHT

Aa 28 / Mm 64



2 Look for a missing band or an uneven block

Black | Dark grey | Mid-grey | Light grey

Each block is uniform in the file. The paper, print mode and driver affect its shade.

3 Check the white area for an added line

The space between these two small marks is intentionally empty.

–

–

Record which output first shows the mark

Direct print	Compare with this PDF on screen.
Flatbed copy	Use a clean direct print or a known-clean original.
Feeder copy	Use that same original, once, in the same orientation.
